I See Nature with New Eyes

K-5 category

I see nature with new eyes

Now going outside is such a prize

When I go to the park and see my friends, I want to keep playing forever

I am reminded that even though we have to social distance, we are all still together

I miss my school and seeing my friends face to face

But am happy I can still learn from home and have a safe space

Now that fall is approaching I see the leaves on the trees turning orange, yellow, red and feel a cool breeze in my hair

I look up at my friends and hope for a world that is safe, caring and fair

I grew up playing on this slide, teeter totter and swing

And look forward to the new playdates with friends of all colors that the future will bring

While playing I look up and see the different colors of nature, brown, red, orange and green

All these colors remind me of a rainbow, the most beautiful rainbow I have ever seen.
